

Welcome to the School of Engineering & IT

Welcome to the School of Engineering and Information Technology(SOEIT) at Manipal Academy of Higher Education (MAHE), Dubai - a dynamic ecosystem where imagination meets innovation, and education shapes the engineers of the future. Our vision is to cultivate globally competent professionals who combine technical excellence with creativity, ethics, and social responsibility.

At SOEIT, we offer a strong foundation across core engineering branches - Mechanical, Civil, Electrical and Computer Science - while embracing emerging frontiers such as Artificial Intelligence, Data Science, and Quantum Computing. Our futuristic curriculum, innovative pedagogies, and state-of-the-art laboratories foster experiential learning and discovery.

We are establishing AI Labs across all engineering domains, enabling every discipline to integrate intelligent systems, automation, and data-driven solutions. This interdisciplinary approach enhances both undergraduate research and industry-driven innovation, preparing students for a rapidly evolving technological world.

We foster a vibrant culture of undergraduate research, industry collaboration, and entrepreneurial innovation, connecting our students with real-world projects and global internships. Our graduates excel in top organizations worldwide, driven by strong technical skills, adaptability, and creativity.

Through robust industry linkages, global placements, and innovation collaborations, our learners gain real-world exposure and entrepreneurial confidence. As we continue to grow, our commitment remains unwavering - to nurture thinkers, creators, and changemakers who will engineer a smarter and more sustainable future.

Dr. Balamurugan Balusamy

Chairperson – SoEIT, MAHE Dubai
